# A new brand based on over 30 years of experience.

We believe that everyone deserves to be surrounded by beauty and comfort. That's why we have created FERNE: a fresh new brand of outdoor and indoor furniture, manufactured in Poland, in the very heart of Europe. FERNE is a response to the growing market demand for outdoor and indoor furniture that is both comfortable and aesthetic. The new brand is based on more than 30 years of experience of Prosperplast. It comprises high-quality products that are at the same time comfortable and beautiful. Our furniture is produced in Poland, in Central Europe. It will fit gardens and homes as well as commercial spaces, such as offices, cafes, and hotels.

FERNE is our latest brand. Prosperplast is a family company that specialises in innovative technologies of plastics processing. We are a worldwide organisation with local production plants located in small towns in Southern Poland. Our products are sold in more than 90 countries.

Over the years, we have focused on three key manufacturing processes: injection moulding, blow moulding, and rotational moulding. Each of them is a different method of plastic forming, which gives us and our customers a wide array of new uses and applications. The three decades of business operations have allowed us to acquire ample experience and unique know-how. Our team of experts and modern machinery guarantee the top quality of Prosperplast products. We can also rely on the extensive infrastructure. We have our own transport fleet as well as warehouse space and production halls of more than 200 thousand square metres, located in Poland, Germany, Czechia, and Hungary. Thanks to that, we successfully carry out our projects and deliver novel solutions that meet the needs of our customers.

Since 1993, we have designed and produced numerous creative solutions for homes and gardens: flower pots, rainwater tanks, garden tools, tool boxes, and storage systems. Now it's time for furniture.

We cordially invite you to the FERNE showroom at our headquarters in Rybarzowice, southern Poland.

See more on page 10.

We design furniture with the user's maximum comfort in mind. In the photo:  
Design process of BRENE collection.  
See more on page 10.

## Comfort-focused design.

Comfort is our top priority. When creating the FERNE brand, we have followed the latest global design trends to make our furniture timeless. Drawing from our in-depth knowledge of materials and their distinctive properties, such as elasticity, lightness, and resistance to damage, we create furniture that is not only comfortable for everyday use but also easy to transport and store.

Every piece by FERNE is designed with the users' maximum comfort in mind. We achieve that comfort without using any additional upholstered elements. Thanks to the use of 100% recyclable plastics, our products are an eco-friendly alternative to valuable primary raw materials, such as wood or rattan.

## Quality widely available.

We are deeply convinced that furniture of the best quality should be available to anyone who values beauty and comfort. At FERNE, our goal is to offer first-rate products at affordable prices. To achieve that, we cooperate with renowned design studios from Poland and other countries.

As Prosperplast, based on our 30 years of experience, we have used the existing distribution channels, advanced logistics, and efficient manufacturing processes to turn our vision into reality. What matters to us as well is building long-lasting and committed relationships with our business partners. As we are in constant dialogue with our customers to make sure we understand their needs, we deliver timely and reliable solutions that meet their expectations.

## The circular nature of plastics.

Circularity is one of the key standards at Prosperplast, alongside quality and safety. Our priority objective is to effectively manage resources in line with our philosophy of sustainable development.

Currently, recycled materials from external sources constitute around 40% of all the materials used in our manufacturing plants. We are constantly increasing the use of the recycle thanks to the rapid growth of the plastic recycling sector in Europe.

The furniture by FERNE is characterised by its durability, lightness, and 100% recyclability.

As a large manufacturer, we build internal closed loops of resources, water, and energy. The closed-loop production process reduces the use of industrial water and heat. What's more, we have our own photovoltaic power plant to reduce our carbon footprint even further. In 2023, thanks to our resource management strategies, only 0.5% of our plastic waste had to be recycled externally.

# Rooted in local furniture heritage.

Hardworking, professional, and innovative — the people who live in our region have always been like this. That's why FERNE draws on the rich local furniture tradition that dates back to the 19th century. It was then that bentwood furniture manufacturing developed in the city of Bielsko-Biala and in the region, following the methods by Michael Thonet. As an outstanding entrepreneur with a pioneer spirit, he launched the production of beautiful and functional beechwood furniture, accessible to the general public.

In the 1920s and 1930s, our region was also a leading manufacturing centre of nickel-plated bent tubes furniture. It was from here that Bauhaus icons, created by excellent designers such as Bruno Weil and Marcel Breuer, were sent out into the entire world.

Building on the legacy of Michael Thonet, we have written a new chapter of the local history of furniture manufacturing. At Prosperplast, we produce affordable, durable, and lightweight furniture with a timeless design aesthetic, at the same time taking up new challenges and using innovative plastics processing technologies. Our products are environment-friendly and fully recyclable.

# Brene

The BRENE collection is inspired by the timeless and iconic bentwood furniture.  
In the photo: a chair with armrests, a side table, an armchair, and a chair.

# FERNE

FERNE

## Timeless and light beauty.

The BRENE collection redefines design. It has been inspired by the timeless and iconic bentwood furniture which was manufactured in the region of Bielsko-Biala in the early 20th century. The projects are marked by visual lightness and elegance, which match both modern and classic spaces. The cohesive colour palette has been carefully designed to create one-of-a-kind arrangements by freely combining pieces in different colours. All of the above makes the BRENE collection perfect for versatile uses.

When designing the furniture, we placed emphasis on human-oriented ergonomics, with the users' needs in mind. The seats and backrests are made of breathable slats and they adapt naturally to the body shape for ultimate comfort. All the items in the collection are lightweight and easy to carry. Their construction prevents water pooling, so they are hard-wearing and easy to clean as well. With its top-notch quality, durability, and timeless design, the BRENE collection is made to last. What's more, particular pieces can be stacked, which makes their storage extremely convenient. All these features mean that every element of the BRENE collection is a synonym for elegance, corresponding with the needs of the most demanding design lovers. The collection consists of a coffee table, an side table, a dining table, a chair, a chair with armrests, and an armchair.

The lightweight construction of BRENE collection makes all items easy to move and store.

**must  
have**

# Brene

The seating options that form the BRENE collection are exceptionally practical and comfortable.

The triangular slats ensure airiness and comfort of sitting. The lightweight construction of the chairs makes them easy to move and store. All the BRENE chairs are moisture-resistant and can be stacked.

They are a perfect choice for both outdoors and indoors — they will work well in any conditions that require durability and resistance.

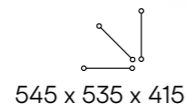

have a seat.

Coffee table

FBR884

Dining table

FBR888

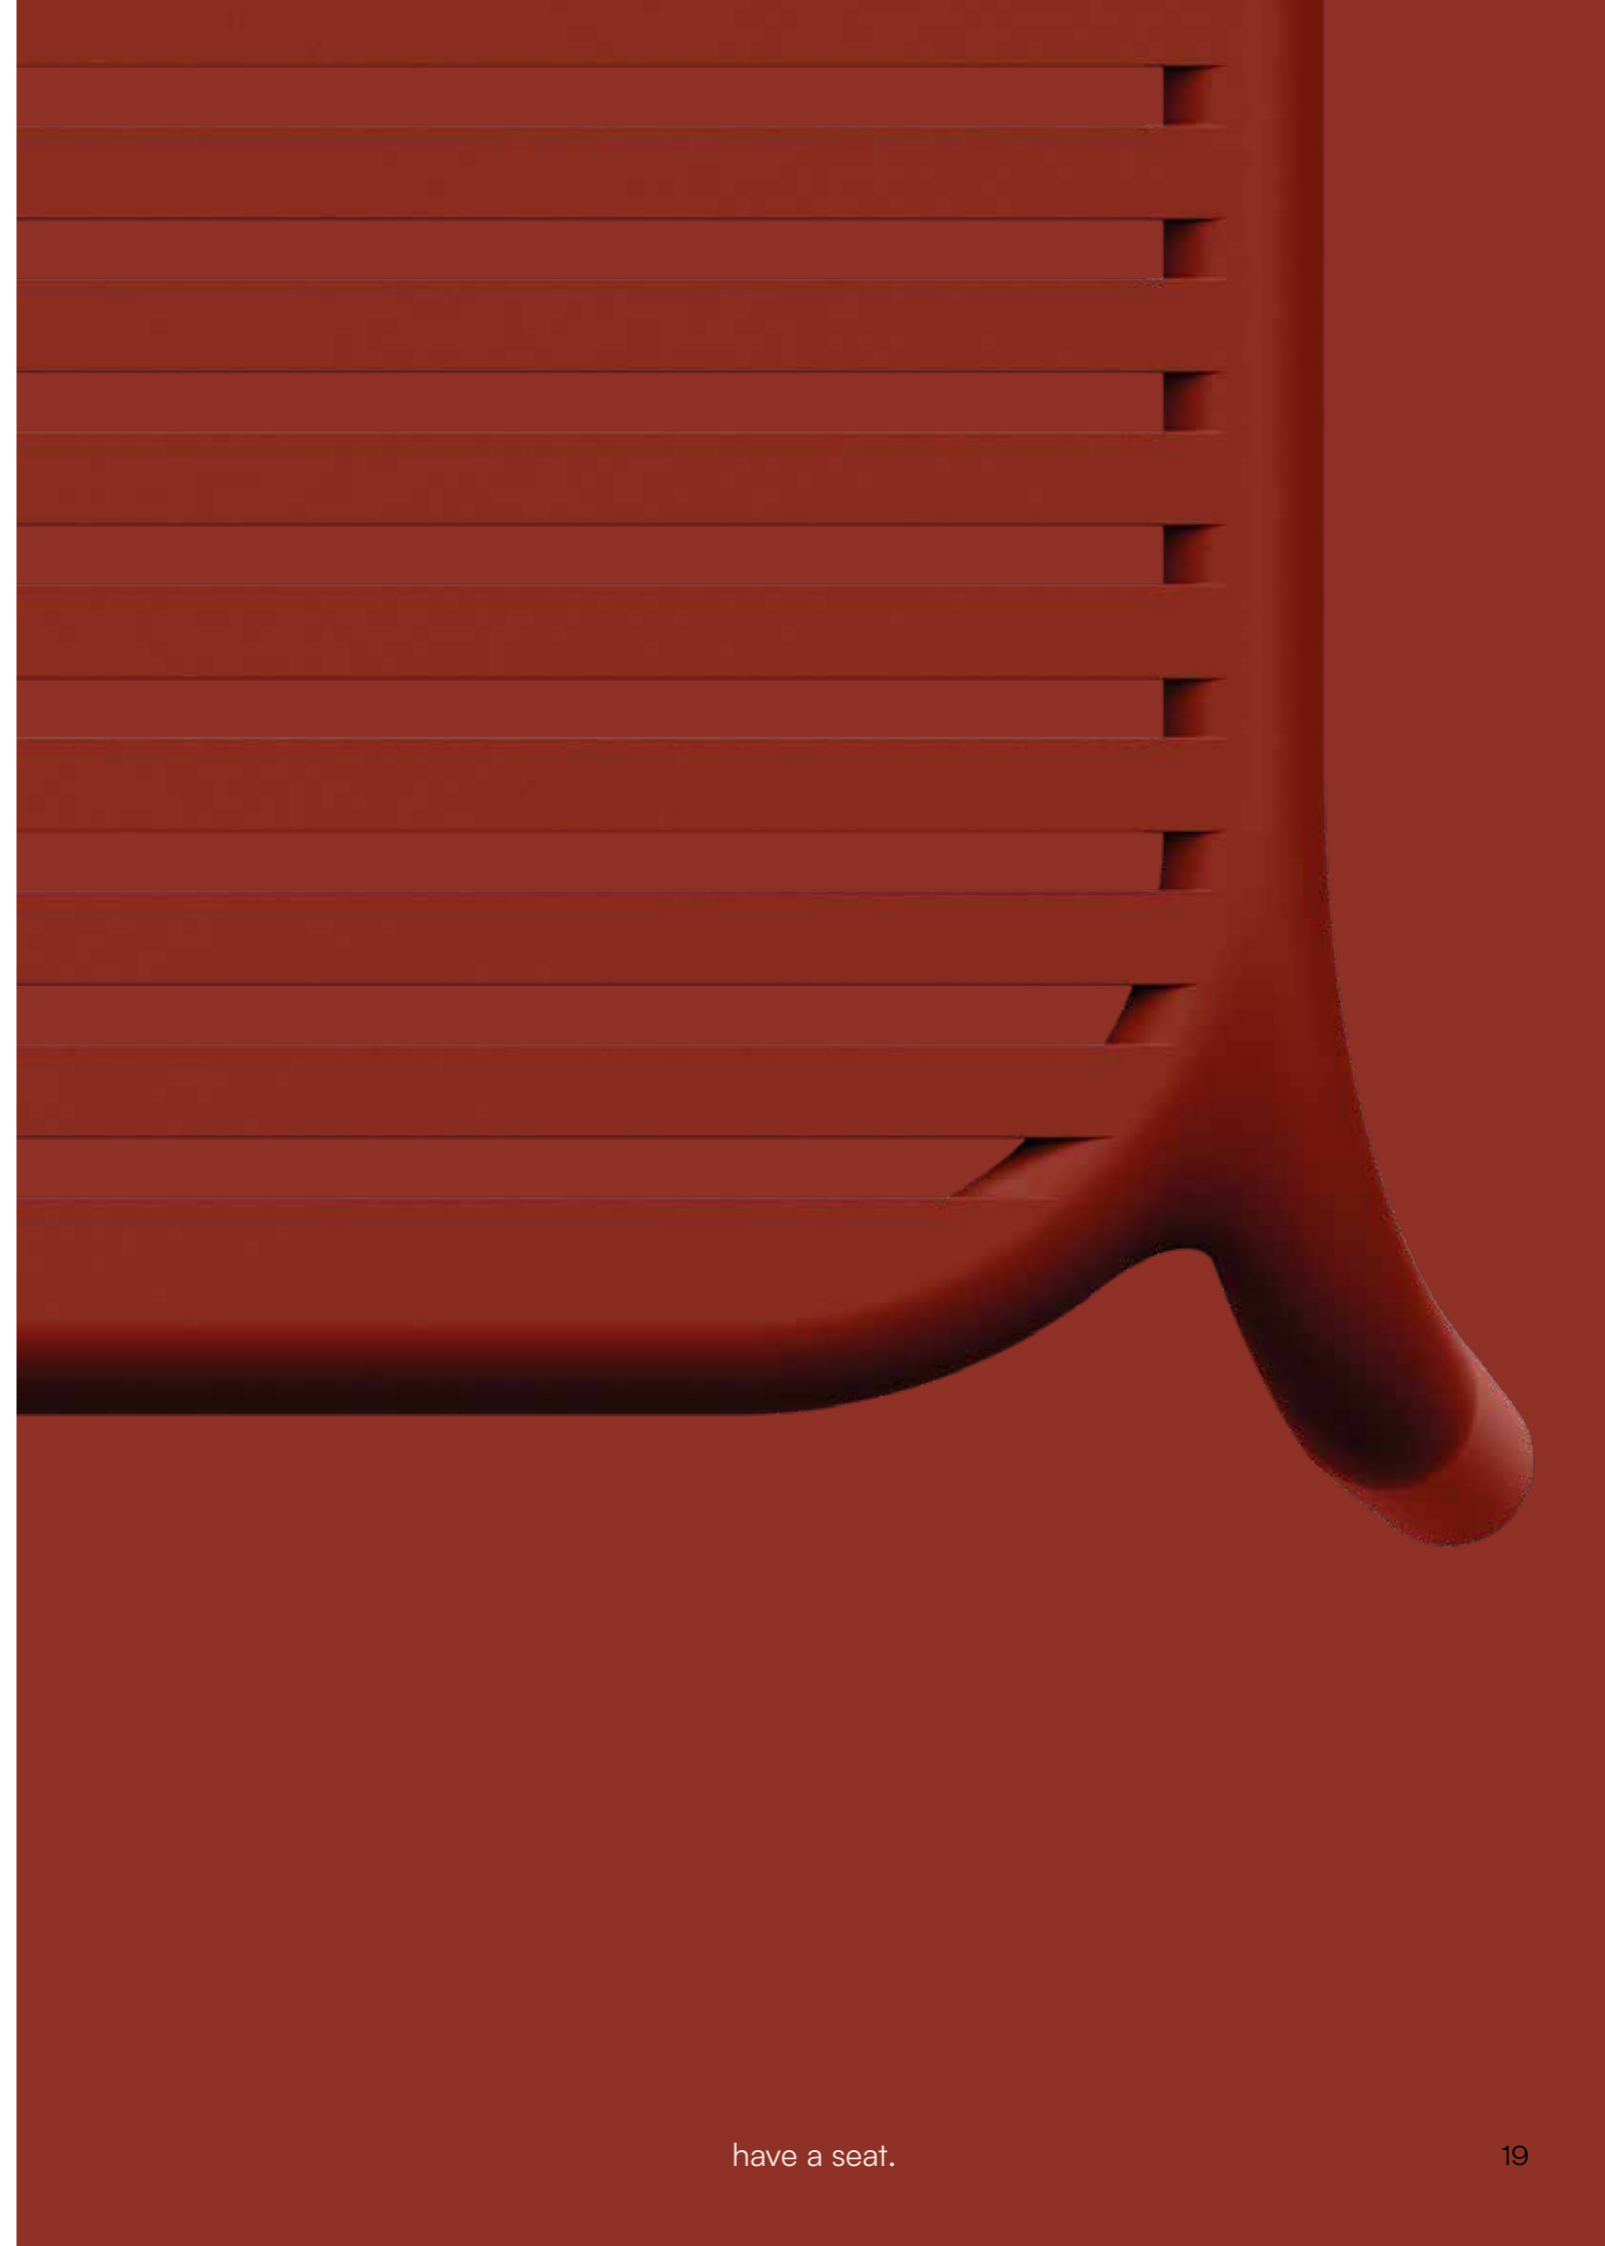

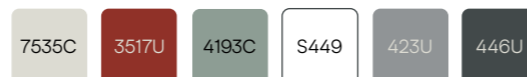

**must  
have**

# Brene

The dining tables, coffee tables, and side tables by BRENE will help you arrange the space in a comprehensive way.

Thanks to the use of slats, the tables are light and easy to keep clean, while remaining robust and durable. As they can be easily stacked, the collection is a convenient choice wherever storage and frequent rearrangements are of importance.

The legs for the dining table and the coffee table are packed separately and they are very easy to assemble. Transporting furniture in parts is a great way to reduce carbon foot print and improve the overall logistics.

# Rimo

The RIMO collection combines the classic elegance with modern materials and functionality.  
In the photo: an armchair, a low bar chair, and a chair with armrests.

# FERNE

FERNE

## Light classic collection.

The RIMO collection combines the elegance of classic bentwood furniture with modern design and functionality. Here, tradition meets innovation, and the classic form is paired with modern moulding methods and materials. The gentle rounded shapes that allude to Thonet's designs are coupled with stylish colours to give the furniture a delicate and fashionable look.

The smooth lines and "bent" elements create a harmonious combination of classic design and modern solutions. Made with precision and attention to detail, the collection is of prime quality. The RIMO furniture is functional and comfortable while retaining timeless aesthetics. It's a sustainable and affordable alternative to traditional wooden chairs.

The collection comprises a chair, a chair with armrests, an armchair, two bar chairs of different heights, a round side table, a round high side table, coffee tables, and dining tables.

# Rimo

The chairs from the RIMO collection are an example of a harmonious match between classic design and modern functionality.

The designers focused equally on how the chairs look and how comfortable they should be. This resulted in an original system of testing the ergonomics of the chairs and optimising their weight.

What's more, as the chairs are stackable, they can be easily rearranged and stored. Comfort and stability are ensured by the rubber chair feet.

# Milane

Characteristics of the MILANE collection include the minimalist style,  
exceptional sitting comfort, and a simple logistics.  
In the photo: a chair with armrests, an armchair, and a chair.

# FERNE

# Available comfort.

MILANE is an impressive collection of comfortable garden furniture. Its characteristics include the minimalist style, exceptional sitting comfort, and simple logistics. As monolithic forms are very popular among users, we have decided to create an entire collection in this spirit. By optimising the production process, we've made sure the collection is affordable for the wide public.

With their distinctive bends and soft shapes, all the pieces look strong and attractive, ensuring stability and durability. The single-point injection technology used in the MILANE collection created the smooth shapes of the furniture, emphasised by the satin finishing. The collection offers an array of subtle, timeless colours. MILANE comprises a chair, a chair with armrests, an armchair, and an side table that can also serve as a stool.
